Speed & Efficiency—Winning Tomorrow's Competition

The world is in a state of transition: alliances, partnerships, and international cooperation are being put to the test, and some place greater importance on pursuing their own short-term interests than on long-term prosperity for all based on cooperation. At the same time, international networking and new technologies are causing disruptive events to occur ever more rapidly and at shorter intervals.

Against this backdrop, the major economic regions are realigning themselves globally. Speed and efficiency have become key factors in competitiveness. Companies in the German and European automotive industry are rising to this challenge and undergoing fundamental changes.

Consistent networking within the operational disciplines of logistics, production, and quality is crucial in this process. Disruptive events must be identified as quickly as possible and communicated to all affected stakeholders in the value chain so that they can respond rapidly. Maximum process transparency must be used to increase efficiency and eliminate non-value-adding processes. Through these industry's measures, combined with the creation of attractive and competitive location conditions by the German government and the EU Commission, we can win the competition for the digital and climate-neutral mobility of tomorrow.

The Automotive Logistics Forum 2026 addresses all of these questions. Decision-makers and experts from the automotive, logistics, semiconductor, information technology, as well as research and science sectors will gather at the Autostadt in Wolfsburg to discuss the roadmap for the development of our industry.

Look forward to two exciting and eventful days with stimulating plenary and specialist presentations. Take the opportunity to find out about the latest products and services at the accompanying trade exhibition. Experience fascinating future technologies and concepts up close during the factory tours.

All this awaits you on March 4 and 5 in Wolfsburg. We look forward to seeing you there.

Hildegard Müller
President, German Association of the Automotive Industry (VDA)

Kai Althoff
Chairman of the Executive Board BVL
CEO, 4flow

Forum-Partner 2026

Gold-Partner 2026

What to expect at the Automotive Logistics Forum 2026

In the keynotes, plenary discussions, and specialist lecture sequences, decision-makers and experts will talk about how, in their view, the requirements for logistics in the new mobility can be met. Speakers include Hauke Stars (Volkswagen), Arnd Franz (Mahle), Helmut Schweighofer (DSV), Michael Schüttrumpf (Schnellecke), Sebastian Peters (Airbus), and Axel Bantel (BLG).

The After-Work-Hangout and Evening Event are opportunities to celebrate and network. The highlights are the speech by VDA President Hildegard Müller and the presentation of the VDA Logistics Award. The accompanying trade exhibition offers even more networking opportunities and an overview of the market for logistics solutions and services for the automotive industry. Connected tables can also be found here.

Three different tours offer a multifaceted insight into the world of Volkswagen: the factory tour takes visitors on panoramic trains to see vehicle production up close and conveys the impressive dimensions of the Volkswagen plant in Wolfsburg. On the Autostadt tour, visitors experience the park and lagoon landscape, discover architectural highlights, and gain exclusive insider insights from the guides. At the Zeithaus, a journey through time takes visitors past over 260 historic vehicles of various brands and showcases influential innovations in automotive history.

In addition, KWD Automotive (Schnellecke Logistics), a leading specialist in body and structural components, opens its factory doors: The tour offers exciting insights into modern manufacturing processes—from forming and welding technology to the fully automated assembly of high-quality vehicle components.

Experience experts from the industry

Factory Tours

OUTDOOR SEQUENCE

Day 2 | 5th March 2026

Registration will take place exclusively during the first coffee break on the first day at the event counter.

from 14:30 | Factory Tour

Volkswagen Wolfsburg Plant

The heart of the Volkswagen Group is located directly at the Mittelland Canal: the Wolfsburg plant. Covering an area of over six square kilometers, more than 50,000 employees work here, building models such as the Golf. The plant is not only a production facility, but also the headquarters of the Volkswagen Passenger Cars brand and the corporate headquarters of the Group with its twelve vehicle brands.

Tour 1 - Volkswagen Factory

Experience the processes at the heart of production up close on the panoramic railways – just a few meters away from presses, robots, and the people who build the vehicles. The factory tour also gives you an impression of the impressive dimensions of the site.

Tour 2 - Autostadt All Around

Discover the special attractions and displays of the Autostadt. On a 60-minute tour through the idyllic park and lagoon landscape, you will receive exclusive insider tips from experienced tour guides and see impressive architecture, exciting stories, and lovingly staged highlights.

Tour 3 - Automotive History (Zeithaus)

Embark on a journey through time with historic and iconic vehicles and their fascinating stories. On a 60-minute tour of the Zeithaus with more than 260 vehicles from over 60 different brands, you will experience five floors of automotive history: with style-defining vehicles and the moving stories behind these icons. From progressive innovations to breathtaking vehicle details to automotive legends.

from 14:30 | Factory Tour

KWD Automotive (Schnellecke Logistics)

KWD Automotive is a leading system partner to the international automotive industry and specializes in innovative body and structural components. Using state-of-the-art manufacturing technologies – from forming and welding technology to fully automated assembly – KWD supplies high-quality components that are used in vehicles from renowned manufacturers worldwide. During the factory tour, you will gain exclusive insights into the development and production of car body parts and assemblies.
